

FP & CR

**Transition elements:**

- Lower river management  
(Delta management study)
- Old River control > Atchafalaya R.
- Upper river management
- Science & Technology Improvement
- Over build water control structures

Strategic restoration and flood protection, i.e. artificial wetland creation

transition

Self-sustaining CR & low O&M Eng FP, i.e. natural wetland creation

Latent funding due to CIP & HK & HR

Time →  
10 – 20 years

Energy costs exceed local economic growth
